- **Awards:** NYU Tandon Hackathon Overall Winner, College of Arts and Sciences Dean's List (2020–2024)

PROJECTS

Revenue Loss Analysis for Clipboard Healthcare

Mar 2025

- Cleaned, transformed, and organized data from over 100,000 shift records using Excel workbooks and Python uncovering \$697,745 in revenue loss due to unclaimed shifts.
- Generated actionable insights and visualizations to highlight trends, offering recommendations that could help reduce unclaimed shifts by 30%, thus enhancing revenue performance.

Retail Labor Market Trends

Feb 2025

- Utilized Python and advanced data analysis techniques to process and analyze five large datasets, each containing over 500,000 records, uncovering key retail labor trends and workforce dynamics.
- Produced insights and visualizations, generating a comprehensive report and newsletter on the evolving retail labor market.

Data Professionals Survey Analysis

Apr 2025

- Created a PowerBI dashboard and report that explore key factors such as salary trends, educational background, and work/life balance for professionals in data-related roles.
- Performed data cleaning and transformation using SQL and Power Query to prepare the survey data for analysis.

PROFESSIONAL EXPERIENCE

NYU Learning Center

New York, US

Learning Assistant

Jan 2023 – Dec 2024

- Led and organized training workshops for Mathematics, Statistics, Academic learning strategies, and Time management skills for 100+ students in coordination with other tutors.
- Provided tailored tutoring sessions in Statistics, Data Science, Mathematics, Economics and Finance to over 400 students, demonstrating strong communication skills and an analytical approach to learning.

Europe Economics

London, UK

Consulting Intern

Sep 2022 – Dec 2022

- Conducted research using academic literature and developed data models to quantify the national harm caused from scam calls, and published findings for the Irish communication regulator (Comreg).
- Extracted, cleaned, and analyzed data from 6 extensive survey datasets for the European Union's Emission Allowance Auction with Excel and Python, delivering actionable data-driven insights to stakeholders.

Playbook Sports

New York, US

Data Analyst Intern

Jan 2022 – May 2022

- Optimized cost strategy by reducing advertisement spending by 10% through data cleaning and filtering of Google Ads data using Python, which enabled the identification of high-value keywords and improvement of website traffic.

TECHNICAL SKILLS

- **Technology:** Python, SQL, R, PowerBI, Power Query, MS Excel, Tableau, TensorFlow, Github
- **Analytical Techniques:** Data Analysis, Data Visualization, Data Cleaning, Machine Learning Modeling
